

Case Study – Smart Grid solution

Client Name - Chhattisgarh Electricity Board, Raipur

Scope –

Installation of AMI including Smart meters

Application -

Residential and commercial area under State Utility for Power distribution.

BBIPL manufactured & installed Smart Single Phase /three phase meters. Meters were provided Zigbee communication facility and they were communicating to Server via DCU. A meter data acquisition software (MDAS) was also demonstrated.

Parameters like remote connect disconnect , load management , energy audit are successfully demonstrated.
